Increasing Use of Drugs in This Form In-

A comparatively recent invention, vastly extended in its application within three or four years, has wrought a curious change in the practice of medicine. Country physicians 100 years ago, when there were few druggists outside of considerable towns, carried in their bags or medicine chests a of drugs, pills, powders, lotions and what not. S u c h physicians made up their own prescriptions and furnished their patients with medicines. The use of medicines in the logs of tables. form of tablets tends more and more toward a

return of tablets tends more and more toward a return of modern physicians to the methods of their predecessors. Physicians everywhere now write fewer prescriptions than they wrote ten years ago, and the form of even two years ago, use of medicine in the tablets is extending every day. day.

It is only ten or fiften years since compressed tablets of chlorate of potash began to be used. Other simple drugs were then put up in tablet form, and gradually the variety of

up in tablet form, and gradually the variety of drugs and prescriptions thus prepared was extended until now it includes the usual sequence of the compounds. Any physician may prescription up into tablets. The usual requirement is that at least 5,000 tablets shall be ordered. Many well-known prescriptions of famous physicians.

at least 5,000 tablets shall be ordered. Many well-known prescriptions of famous physicians have already attained a wide celebrity in the medical world through their use in tablet form. Hundreds of liquid are thus used by inert material with just as homeopathic prepared in the form of sugar pellets. The tablet factories are constantly experimenting with a view to reducing further drugs and prescriptions to tablet form. They are ready to vary known prescriptions in accordance with the fancy of individual and to combine one or

ary known prescriptions in accordance with the fancy of individual and to combine one or scriptions in a single general use of tablets of prescriptions has greatly simplified the practice of medicine. The physician, instead of writing a prescription and instructing his patient to have it compounded by a druggist, leaves the necessary number of tablets, with instructions as to the time ner of taking. Nearly physician is provided with such tablets, and many use them in great quantities. Tons of drugs are now put up in this form. It is the wholesale method of modern life applied to the average of the scriptions.

in this form. It is the wholesale method of modern life applied to the preparation of medicines. Apothecaries have felt the effects of the change in practice through the lessening in the number of prescriptions to be compounded. For the patient it has end the toring, for the patient obtains the toring, for the tablets at so low a rate that he usually makes so charge for those supplied to his patients. New as the use of tablets is, the form of the abilet has been greatly improved since their in-

olet has been greatly improved since their in-oduction into medical practice. Tablets
Tablets
pressed
years ago.
The machinery for making them originally was, and perhaps still is, controlled by a single wholesale drug house of this

city, but there are many manufacturers of tab-lets here and elsewhere. When the patentees arst began to call their products to the attention of physicians, the tablets very slowly made their way, because the pat-entees we re the medical profession. Then they associated themselves with a famous drug house, and the tablets soon began to go. on the tablets soon began to go.

Only the simpler drugs and remedies put up in tablet form are accessible to the general public. The compounds are not even known by name outside the medical pro-

public. The compounds are not even known by name outside the medical profession. As they medicines they medicines they medicines they medicines they medical newspapers. They come to physicians with a label that proclaims the ingredients and their proportions. Physicians have the good repute of the manufacturer as guarantee that tablets are made of pure drugs and carefully compounded. The best tablet are made of pure drugs and carefully compounded. The best tablet are made of pure drugs and carefully compounded are not even known are not even known to profession.

INTERESTING SECRET HISTORY OF AN OLD- Nearly Died

A certain well-known preparation is so largely A certain well-known preparation is so largely prescribed by physicians that its use by them may be said to be universal. Conversationally it is spoken of among themselves as the "R. & S. Compo." If you are ill and call the doctor, no matter what else you moderately certain to of the forms of the forms of the forms of the prescription. Its use prescription. Its use prescription. Its use prescription in the provided in the prov

powders; but of late it has been found possible to prepare it in tablets, the form now so popular with physicians for all standard medicines. So enorm ous is the from physicians solely, arious forms of this various forms of this preparamanufacturing chemist in New York City made and sold 350,000 pounds of these tablets in the year 1893—and this, be it borne in mind, was to physicians alone, or to fill orders from dealers from whom physicians obtain their supplies. Every physician of eminence has his "R. & S." Learning were more or less from the Every physician of eminence has his "R. & S." formula, varying more or less from the original, but substantially the same—that is, depending upon the bases indicated by the letters R, & S.

RIPANS TABULES.

The Ripans Tabules represent the latest and most improved form of this preparation. The separate letters commost improved form of this preparation.

The separate letters composing the word R-1-P-A-N-S are the initials of the six ingredients.

A n y doctor knows what they are.

A and N represent the principal change, and have been found of vast importance. No person who has occasion to make use of a dyspepsia remedy, and has once experienced the beneficial results of these tabules in a case of hillionspess headaghe or any disorder of the of biliousness, headache or any disorder of the stomach, liver or bowels, will ever afterward consent to be without a supply near at hand. A single one gives prompt relief. Price 50 A single one gives prompt relief.

Healing Without Medicine.

Another Free Lecture and Healing Clinic, to Ladies Only, at Builders' Exchange Hall, Wednesday, March 7, at 2:30.

day, March 7, at 2:30.

Over 90,000 people right here in Washington speak of the wonderful cures performed by Dr. Damon. Nearly 900 cases have been treated at the above hall, headed the vast number who have been cured at his printe office, 608 12th street northwest. Such a record as this is unprecedented in the history of the world. No man can say that he does not show by his works his ability to cure when all else has fathed. All forms of discuse have been cured by him and can be witnessed by any one. The sick are cured, the deaf are made to hear, and the crippled do throw near their canes and crutches and return to their house in comfort. His offices are large and commodious and all may go in perfect confidence of getting well if the case is curable at all. He treats the paor free at the hall, but all who consult him at his private offices are expected to pay for treatment. Yet his fees are most reasonable, guided according to the nature of the case and crumstances of the patient. For the convenience of potilents his hours are from 10 to 12.2 to 5 and

illy-cooked food, or food that has been prepared by uncleanly persons.

"After listening to the discourses which ray esteemed colleagues have delivered," he said, "you have perhaps wondered whether there really is any food, any drink, any air or anything else which is free from parasites; you have perhaps deceived your-selves with the thought that if your food passes through the hands of a cook it will be free from germs. Anticipating such a possible conclusion, your committee has requested me to dispel that wild dream from your minds and to assure you that you possible conclusion, your committee has requested me to dispel that wild dream from your minds and to assure you that you may obtain parasites from a tongue sandwich, from a plate of soup, from pork chops or even from a dish of salad. The parasites which you have been told about thus far in this course of lectures have all been microscopic plants, but you must not imagine that because my predecessors have spoken only of plants that animals are never parasitic. On the contrary, the largest parasite which man has are animals. Some of the animal parasites which man obtains through the food are microscopic, others are an inch or so long, others a foot long, some reach a yard in length, while three of them grow to be sixteen, twenty-four and thirty-two feet long respectively, and one of these under favorable conditions may stretch itself to the enormous length of 100 or 150 feet."

four and thirty-two feet long respectively, and one of these under favorable conditions of 100 or 100 feet."

At Lunch With the Professor.

The lecturer then invited his hearers to an imaginary bunch with him in order that he might show them some of the wonderful objects it was possible for them to swallow without their knowing it. "The repast," he said, "to which I invite you is not such a one as you would yourself prepare, but it is one which might be prepared by the ignorable without their knowing it. "The repast," he said, "to which I invite you is not such a one as you would yourself prepare, but it is one which might be prepared by the ignorable without their knowing it. "The repast," he said, "to which I invite you is not such a one as you would yourself prepare, but it is one which might be prepared by the ignorable with the propagation of the prepared by the ignorable with the propagation of the prepared by the ignorable with the propagation of the prepared by the ignorable with the propagation of the prepared by the prepared by the propagation of the prepared by the prepared by the propagation of the prepared by the prepa

was the only specimen, probably, in Ameri-ca. This was what is known as the guinea worm, which some scientists look upon as the flery serpent of the children of Israel. worm, which some scientists look upon as the fiery serpent of the children of Israel. If one happens to be in Egypt or in certain parts of Asia he might become infested with this worm by taking it with a drink of water. This parasite, Dr. Stiles said, is about a yard long and lives under the skin. It produces large swellings, accompanied by an intense burning sensation, hence the name flery serpent, or fiery dragon, which it retains until the present day. The parasite is caught by swallowing small crustaceans in unfiltered water, for the larval stage of this worm lives in these minute crabs, eyelops by name. Although we are not likely to catch the fiery serpents like the children of Israel, the lecturer showed how one known as the thread worm, which lives in various parts of the body, and which is so small that a large number may be found in a single drop of lood, may be taken in a drink of water. He described these small creatures developing into tapeworms and other monsters that might he swallowed with one's beef, or veal, or pork chops. In eating half-cooked pork, one might eat a piece infested with the much-dreaded trichinae.

The Dreaded Trichinae. little creatures, although they are the ob-jects of considerable fear to the physician, who knows only too well that if these para-Epps's Cocoa.

Dumbarton Church.

nue Church was to have severed his connection with Georgetown tomorrow in order to accept the pastorate of the Spring Garden Church, Philadelphia, but his illness a will probably detain him here at least a week, possibly for a month, and even more. He was anxious to be present at the M. E. conference, which convenes tomorrow at Frederick. Dr. Elliott has been an exceedingly hard worker since he came to Georgetown, and his present condition is thought to have been produced by excessive labor. Last night the officials of the church held their regular quarterly meeting and transacted business in connection with the change of pastors.

It was agreed to improve the parsonage both internally and externally.

Those in authority at the church, it will be remembered, have recommended the appointment of the Rev. J. B. Stitt as Mr. Elliott's successor, and it is thought that the recommendation will be honored.

Mr. Stitt is at present pastor of the Fayette Street Church of Baltimore. Most of his religious work has been done in the monumental city.

Until the conference adjourns the Dumbarton pulpit will be filled by visitors.

A Good Time.

Stohlman's Hall was crowded last night with Rechabites in honor of the twenty-fifth anniversary of Mr. Robt. Emmet Smith's entry into Heber Tent. Mr. Smith made an appropriate address, after which a pleasing program was presented by the following contlemen: R. W. Johnson, F. a pleasing program was presented by the following gentlemen; R. W. Johnson, F. Daiton, E. H. Harner, Sam'l Elson, E. R. Hintenach of Heber Tent, A. K. Belt, J. C. Lee, John Jackson, Geo. Shoomaker of Anacostia Tent, Charles Steers, J. C. Adams, James Price of Union Tent, H. Salkeld of George C. Thompson Tent, Mr. Allen of Washington Tent, High Secretary John R. Mathoney and others. Refreshments were served and a good time enjoyed.

Died of Yellow Fever at Rio

The New York World's special cable from Rio de Janeiro, says: George M. Rollins, who volunteered to act as an intermediary between Admiral Da Gama and the American merchantmen in the incident which culminated in the U. S. cruiser Detroit firing on the insurgent warships Trojano and Guanabara, died today of yellow fever.

Capt. W. A. Sturgis of the American steamship Santuit, which towed the Pirating (Destroyer) from New York to Pernambuco to join President Peixoto's new fleet, also died today of the same disease.

Another tentermana victory.

Two of the largest in the coastwise fleet
yesterday ended an exciting race at New
London,Conn. They were the Mary A. Randall of New London and the Stella B. Captain of Orient, L. I. The race was to test the merits of the keel and centerboard built vessels, and the Randall, which is a centerboard vessel, reached port first, about ten minutes in the lead. Both vessels were from Philadelphia.

Robert Garrett's Condition.

Garrett, ex-president of the Baltimore and Ohio railroad, had suffered a stroke of paralysis, but this was emphatically denied at Uplands, Mr. Garrett's country home near Baltimore, yesterday. Mr. Garrett's condition remains about the same. He is not considered critically ill, yet he requires a constant attendant. On fine days he is placed in his comfortable arm chair and wheeled about the grounds surrounding the mansion. had been reported that Mr. Robe

"All in a Row."

It is a unique sight to view at Carisbad the motley row of drinkers of all nations, languages, manners and costumes hurrying down in single flic to the boiling Sprudel Spring with an earthenware nug in their hands or siung by a strap round the neck or over the shoulder, and patiently waiting their turn to sip of the preclous fluid. For three centuries or more all sorts and conditions of men, from the king to the tramp, have pligrimized hither in scarch of new life or rellef from paid. But we cannot in these competitive days afford the time or money to travel so far afield, so it is brought to your doors hottled in its natural and brought to your doors hottled in its natural and original form at the spring, or in powder evaporat-ed on the spot, and so well known as the Carlabad Sprudel Water and Carlabad Sprudel Salt. Ruptures.

Threw Out a Commissioner.

The Denver city hall was thrown into the greatest excitement yesterday over a raw between Mayor Van Horn and Street Combetween Mayor Van Horn and Street Commissioner Thomas Foulkes, which resulted in the mayor bodily throwing the commissioner out of his office, and ordering him to never enter it again until he could obey orders. The trouble was over the discharge of Street Sprinkler Van Court by Foulkes. The mayor claims that Van Court is a competent officer, and has been discharged upon demands from the American Protoctive Association. The mayor, at one time a member of this association, was expelled because he appointed a Catholic to the position of inspector of police, and this trouble seems to be a continuation of the fight.

Richard Carroll, better known as Dick McCann, assistant starter at the Gloucester McCann, assistant starter at the Gloucester race track, is dying at a hospital in Philadelphia. After Gloucester closed, McCann came to Washington to start the Ivy City races. He caught a bad cold, which rapidly developed into quick consumption, and the doctors said last night that he had but a few days to live. He is a New York boy and is well known about all the tracks.

To Support the Cleopatra A special from Panama says: Another British man-of-war has been sent to Blue fields to support the Cleopatra in restoring fields to support the Cleopatra in restoring the status in the Mosquito reservation, pending the arrival of definite orders from the British government. The Cleopatra sent three boats ashore, with eighty marines and two pieces of artillery, to protect Chief Clarence, who said that his life had been threatened. The Nicaragua forces offered no resistance.
